

Grigory Solomatov

Applied Mathematician | Programmer | PhD

✉ grigorys93@gmail.com — ☎ (+47) 924 544 17

About me

I'm an applied mathematician with experience in academic research as well as software development in the industry. Now, I seek to employ my technical training and problem-solving skills to create tangible socio-economic value. My greatest asset is a diverse set of highly transferable techniques from mathematics and computer science paired with a well-practiced ability to study challenging problems systematically and deeply.

Experience

- **Postdoctoral researcher** 2022–2026
University of Haifa
Image restoration in scattering media.
- **Postdoctoral researcher** 2022
Tel Aviv University
Coding theory for neural networks.
- **Research assistant** 2021
Technical University of Denmark
Computer algebra for coding theory.
- **Software developer** 2017–2018
RailCOMPLETE
Modeling software for railway engineers (C#).
- **Summer Intern (software developer)** 2016
Schlumberger
Modeling software for geoscientists (C++).
- **Summer Intern (software developer)** 2015
Schlumberger
Modeling software for geoscientists (C++).

Education

- **PhD** 2018–2021
Technical University of Denmark
Computer algebra for coding theory.
- **MSc** 2016–2017
Technical University of Denmark
Applied mathematics.
- **BSc** 2012–2016
Norwegian University of Science and Technology
Physics and mathematics.
- **High School** 2009–2012
Bardufoss-Høgtun videregående skole
General studies.

Languages

- **English:** Fluent reading/writing
- **Norwegian:** Fluent reading/writing
- **Russian:** Fluent reading/writing

Programming

- **Python:** Pandas, NumPy, SciPy, PyTorch, Keras, OpenCV, Scikit-Learn, LiteLLM, SageMath, Manim
- **JavaScript:** Node.js, Socket.IO, React
- **Lua:** LOVE2D
- **Matlab • Lisp • Bash • C# • C++ • Rust**

Tools

- Emacs • Git • $\text{\LaTeX}$ • InkScape • Gimp
- Godot • Unreal Engine • Unity • Phaser

Mathematics

- Linear algebra • Optimization
- Discrete mathematics • Graph theory
- Computer algebra • Coding theory
- Computation complexity theory

Other skills

- Problem solving • Research
- Mentoring • Supervising • Teaching
- Technical writing/presentations

Interests

- Large language models • Agentic AI
- Data analysis • Image processing

Hobbies

- Chess • Tabletop games • Game design
- Guitar • Piano • Ukulele • Theremin
- Puzzles • 3D printing • Running
- Brazilian Jiu-Jitsu • Horseback riding
